Here are three things you can do

to reduce medicines waste.

Open the bag before you leave.

Medicines that leave the Dispensary have to be discarded.

Only order what you need.

Medicines you don't take away this time, will be available in the future.

Return unwanted and expired medicines to us.

This protects the local waterways, wildlife and the environment.

Help us to improve your care, NHS finances and protect the environment by reducing medicines waste.

We can all play a part to stop prescription waste.
